

Web design to showcase the beautiful scenery of the Sierra National Forest

Project Title	Web design to showcase the beautiful scenery of the Sierra National Forest
Project Summary	Design a professional Sierra National Forest website keeping it simple and user friendly.
Country	United States

Project Description

We are looking for a self-motivated and determined individual who is willing to put together a fresh update to our wonderful Sierra National Forest website. Student will explore all department areas and establish a design to best fit each department and their business. We don't expect perfect but just with a touch of excitement that jumps out when one looks at the webpage.

Required Skills or Interests

Skill(s)

Website design

Additional Information

Individuals will be working with multiple department personnel to best design the feel of the website for that shop. The design will be for our intranet and internet webpages. Some key templates will be provided to stay consistence with USDA standard.
